

Total U.S. Apple Holdings Remain Below 2004 Levels

The supply of apples in storage across the United States remains below the levels seen during the same time period last year, according to a survey of apple storage facilities completed by the U.S. Apple Association (USApple). Total apple holdings on Jan. 1, 2006 were 7 percent below the Jan. 1, 2005 levels. At the same time, apple movement was reported brisk, running about 3 percent above the five year average.

Total U.S. holdings of fresh and processing apples on Jan. 1, 2006, were 115.2 million bushels. The Jan. 1, 2006, holdings were 1 percent above the five-year average of 114.2 million bushels for holdings on that date.

Total fresh-market apple holdings on Jan. 1, 2006, were reported at 76.1 million bushels, a decrease of 7 percent from January 2005 holdings of 81.5 million

bushels, but 4 percent higher than the five-year average for holdings on that date of 73.4 million bushels.

Total processing apple holdings as of Jan. 1, 2006, were 39.1 million bushels, down 8 percent from 2005, and 4 percent less than the five-year average for that date.

Total holdings of fresh-market and processing apples in controlled atmosphere (CA) storage on Jan. 1, 2006, were 98.1 million bushels, a 6 percent decrease from 2005, but up 3 percent from the five-year average. Fresh CA holdings as of Jan. 1, 2006, were 69.5 million bushels, a 5 percent decrease from holdings on Jan. 1, 2005, but 6 percent more than the five-year average for holdings on that date.

Apple Movement Strong
National movement of fresh-market apples is slower than the exceptional rates seen during the

previous crop, but still stronger than the five year average. Fresh market movement totaled 12.4 million bushels during December 2005, an 8 percent decrease over the December 2004 total of 13.6 million bushels, but 3 percent greater than the five-year average of 12.1 million bushels. Regular storage accounted for 6.6 million bushels of December 2005 movement; a decrease of 3 percent from last year's number, while 5.9 million bushels of movement were from CA storage, a decrease of 13 percent over December 2004.

On a regional basis, December 2005 movement of fresh-market apples in the Northeast was 2 percent less than December 2004, but 4 percent more than the five-year average movement. Movement in the Southeast was 30 percent more than in 2004, and 40 percent more than the five-year average.

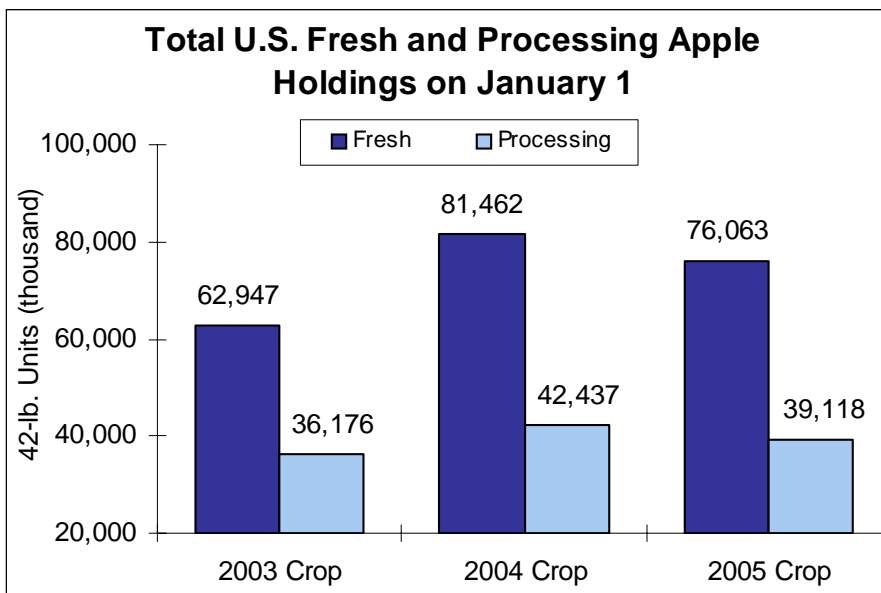

Movement in the Midwest was 23 percent more than in December 2004, and 21 percent more than the five-year average for December. In the Southwest, movement was 13 percent more than December 2004, and 41 percent less than the five-year average.

In the Northwest, movement was 14 percent less than in December 2004, but up 1 percent from five-year average.

Regional Fresh Holdings

On a regional basis, fresh holdings in the Northeast were 13 percent lower than holdings on Jan. 1, 2005, and 5 percent lower than the five-year average for that date. Southeast Jan. 1, 2006, fresh holdings were 10 percent less than on Jan. 1, 2005, but 5 percent more than the five-year average for that date.

Note: Table includes those countries reporting storage holdings as of December 1, 2005.

1) Holdings from EC producer organizations and their members

2) Lerida and Gerona regions

3) Steiermark region

4) Countries included were Austria (Steiermark), Belgium, the Czech Republic, France, Germany, Italy, the Netherlands, Spain (Gerona, Lerida) and the United Kingdom.
