

Fresh Supplies Fall by 29% Vs. Five Year Average

Movement of fresh-market apples from regular and controlled atmosphere (CA) storage during the month of May 2004 was 3 percent less than May 2002, and 15 percent less than the five-year average for movement during that month according to June 1 survey of storage facilities conducted by the U.S. Apple Association (USApple). The lighter movement is attributed to tighter marketing conditions as late-season supplies continue to dwindle.

Apple industry leaders from the United States and around the world, representing all segments of the apple industry – production, processing, sales and marketing – attend each year.

Conference registration materials for Outlook 2004 will be distributed in the near future to all previous attendees and USApple members.

For more information, contact USApple's office at (800) 781-4443. ■
