

Supurb Growing Conditions Boost Fresh Apple Supplies

At 106.6 million bushels, U.S. fresh-market apple holdings were 24 percent greater than November 2003 holdings of 86.2 million bushels, and 20 percent greater than Nov. 1, 2002 holdings, according to the U.S. Apple Association's (USApple) November survey of apple storage facilities conducted Nov. 1, 2004.

Favorable late season growing conditions this year boosted fresh market production in many apple-growing regions, especially in Washington state. This season's greater apple production and higher fresh-market apple holdings are contrasted by lower fresh holdings and lighter apple production in 2002 and 2003. However, when compared to 1999, Nov. 1, 2004, U.S. fresh-market holdings were up 3 percent (see explanatory notes, page 9).

Regional Fresh Holdings

On a regional basis, fresh holdings in the Northeast were 10.8 million bushels, a decrease of 3 percent from holdings on Nov. 1, 2003, and 2 percent higher than the five-year average for that date. Southeast Nov. 1, 2004, fresh holdings were 1.4 million bushels, up 1 percent from holdings on Nov. 1, 2003, and 10 percent less than the five-year average for that date.

In the Midwest, Nov. 1, 2004, fresh holdings were 5.9 million bushels, down 12 percent compared to holdings on Nov. 1, 2003, and down 13 percent from the five-year average. Fresh-market apples in storage on Nov. 1, 2004, were 8 percent higher in the Southwest than on that date in 2003, but 34 percent lower than the five-year average.

Northwest Nov. 1, 2004, fresh holdings were 33 percent higher

than on Nov. 1, 2003, and 16 percent higher than 1999 holdings on that date.

Fresh Holdings by Variety

On a varietal basis, Nov. 1, 2004, fresh Red Delicious holdings were nearly 36 million bushels, a 22 percent increase compared to Nov. 1, 2003, but 21 percent lower than the 1999 holdings on that date.

Fresh Golden Delicious holdings of 14.7 million bushels were up 31 percent from Nov. 1, 2003, but 7 percent lower as compared to the Nov. 1, 1999, holdings.

Fresh Granny Smith holdings of 12.3 million bushels increased 25 percent as compared to holdings on that date last year, and were up 44 percent as compared to 1999 holdings on that date.

Fresh McIntosh holdings of 3.1 million bushels on Nov. 1, 2004, were down 10 percent from the previous year and down 26 percent from the Nov. 1, 1999 holdings.

Fresh Fuji holdings of 12.3 million bushels on Nov. 1, 2004, were up 30 percent from the previous year, and increased 59 percent as compared to November 1999 holdings.

Fresh Gala holdings of 12.5 million bushels were up 45 percent from holdings on Nov. 1, 2003, and increased 113 percent as compared to Nov. 1, 1999, holdings.

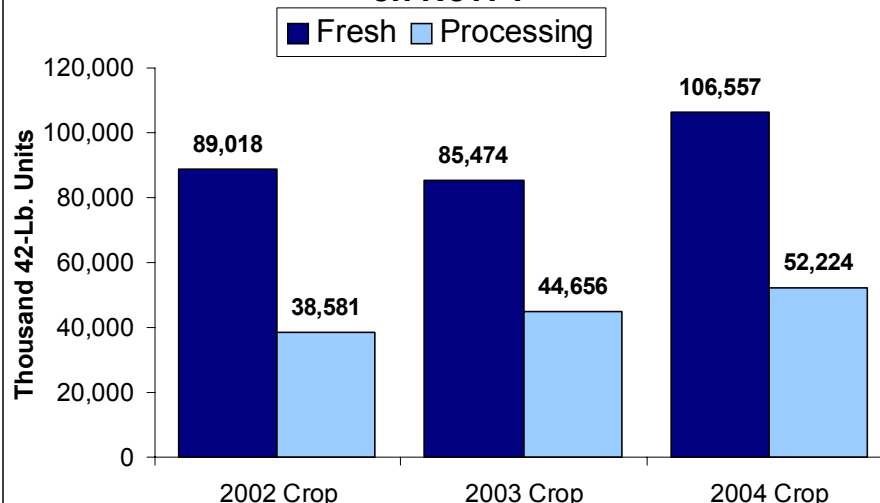

Fresh Empire holdings of 2.4 million bushels on Nov. 1, 2004, decreased 11 percent as compared to last year's holdings on that date and were 28 percent less than the 1999 holdings for Nov. 1.

Nov. 1 Total U.S. Holdings

Total U.S. holdings of fresh and processing apples on Nov. 1, 2004, were 158.8 million bushels, a

Explanatory Notes

- All data for holdings in the United States have been compiled by the U.S. Apple Association on the basis of reports submitted from 650 industry reporters.
- Washington holdings data were not reported in November 2000 and November 2001. Therefore, historical comparisons utilizing Washington data in 2000 and 2001 are invalid. Historical comparisons have been made to 1999, since that is the most recent period when data from all regions are available.
- Data reported for fresh use from most states, except Washington, are generally tree-run fruit.
